Encrypted Cartridge

This is an encrypted document cartridge, which is using two encryption technologies to protect and secure your information.

What is a "Cartridge"? A "Cartridge" document is an Integra Smart Document, which contains metadata that is trusted and verified against the Integra Ledger with its unique hash or digital fingerprint. In order to use this document you will be prompted to enter your password that you used when you created the document. This document needs to be stored in a save location that only you will be able to access.

Please click on the link below to decrypt this encrypted document Cartridge (alternatively you can copy and paste the link into your browser window):

https://hedgefund.z20.web.core.windows.net/

This document contains information about an encrypted document that has been generated using a public key on Integra Ledger. The only way to decrypt the document is by using the matching private personal cartridge.
